

March 6th 1746

Dr Sir

luckily I had made a copy of the plan
requested, in order to paste it into the book
of records as soon as the judge shall have
put his fiat to it & thereby am enabled
to comply with your request in season
which otherwise I should not have been
able to have done - there seems to have
been a mistake in the survey or in not num-
bering the lot behind the Keepe lot - unless
he designed N^o 18 behind the Thomas lot or
G. Jaffrey lot should include it - it is severed
by a front line, as in the copy -
no doubt the committee considered it as
included in N^o 18 - I had no instruments
to make the copy with but a pin, & ruler
& with them could not make a better one I
to try again
